Smart Appointment Booking

The future of Medical Science

Motivation

In today's fast-paced world, access to quality healthcare should be seamless and efficient. However, many patients face challenges such as:

- Long waiting times for appointments
- Difficulty in finding the right doctors for their needs
- Lack of digital platforms to manage bookings
- Limited awareness of available healthcare services

Breaking Barriers in Healthcare Accessibility

Appointment Booking

Users can easily find and book appointments with doctors based on specialty, availability, and location.

Doctor Profiles

Users can view doctor qualifications, specializations, and reviews to choose the best healthcare provider

Seamless User Experience

A simple, secure, and mobile-friendly interface that ensures ease of use for patients and healthcare providers.

Notifications

Automated alerts for upcoming appointments to reduce no-shows and improve time management.

Technologies Used

Frontend

- HTML
- CSS
- JS
- BOOTSTRAP
- Angular

Backend

- Node JS

Database

- MongoDB

Other tools
